

Michael Governanti

Philadelphia, PA | 717 669 7166 | mag574@drexel.edu | [LinkedIn](#) | [Github](#)

Resourceful and innovative learner with 4 years of experience in security operations, systems engineering, and IT security management. Proven track record of implementing supportable solutions and enhancing security. Strong communicator and collaborator who enjoys improving business processes within a team. Knows how to meaningfully read an error message.

SKILLS

Proficiencies: Asset Management | Incident Management | Network Monitoring | Programming & Scripting

Languages: Ansible | ARM | Bash | Go | JavaScript | PowerShell | Python

Technologies: Azure | Digital Ocean | Git | Grafana | Linux | MongoDB | Prometheus | Office Suite & CRMs

EDUCATION

Bachelor of Science in Cyber Security and Information Technology | Drexel University | 2024-2026 | Current GPA 4.0

Associate of Science in Computer Information Security | Harrisburg Area Community College | 2021-2024 | GPA 4.0

CERTIFICATIONS

CompTIA Security+

PERSONAL PROJECTS

Multiplayer Chess Website - <https://bad-chess.com> | <https://github.com/michaelgov-ctrl/bad-chess>

- The site and server are hosted on Digital Ocean with configuration in Ansible IaC and an observability stack of Alloy, Grafana, Loki, and Prometheus.

Point of Sale Memory Scraper - https://github.com/michaelgov-ctrl/CT-201-infosec_project

Recursive Encryption Package - <https://github.com/michaelgov-ctrl/CI-102-SecurityProject>

PowerShell Job Timer - <https://github.com/michaelgov-ctrl/PowerShell/blob/main/Job-Timer.ps1>

PROFESSIONAL EXPERIENCE

WEBSTAURANTSTORE | REMOTE | JUNE 2023 – NOVEMBER 2024

Junior Site Reliability Engineer

- Developed processes to manage Azure resources and a portable application with Entra integration to deploy custom virtual machines in Azure to investigate phishing threats in an isolated environment for technician usage.
- Worked in codebases for Infrastructure as Code(IaC), Configuration as Code(CaC), and internal services with hundreds of thousands of lines and participated in code reviews for code changes, factoring out legacy code, and bringing Go projects up to version 1.23.
- Led efforts to improve observability in pursuit of reducing mean time to detect(MTTD) issues by collaborating with internal development teams to instrument applications, identify crucial operating requirements of applications and infrastructure, and writing custom Prometheus exporters for black-box services.
- Managed assigned ticket queue with projects such as assisting other IT Departments develop automations and improving observability.

CHILDREN'S HOSPITAL OF PHILADELPHIA | PHILADELPHIA, PA | AUGUST 2021 – MAY 2023

Systems Analyst

- Enhanced network performance by monitoring and managing traffic exception queues across multiple platforms and DICOM routing applications.
- Led the deployment of critical enterprise applications across 300+ client workstations, introducing advanced scripting for vendor-neutral archive routing, significantly improving data migration and archiving processes.
- Addressed DICOM data discrepancies through detailed analysis and provided specialized training to radiologists and technical staff on third-party software, enhancing data integrity, diagnostic precision, and patient outcomes.
- Performed strategic patch management and upgrades for over 80 servers, effectively improving performance and strengthening cybersecurity defences.
